PARATRACK **Guidance System**

PARATRACK

HDD Guidance technology, developed and manufactured by Vector Magnetics, is rapidly being adopted as the HDD industry's recognized standard for underground guidance accuracy.

BTS - Beacon Tracking System –Just one of the latest technological break throughs in the HDD steering tool industry.

Precision WIRELESS underground tracking enables combined wire/wireless or totally wireless HDD installations where previously wire guided installations were difficult or not feasible. Underground Tracking across water, under buildings, highways and through restricted areas are now possible.
